Subject : Introduction to the TGS GNSS R Series

Dear Sir/Madam,

Through this letter, we, PT Techno GIS Indonesia, a company specializing in geospatial technology with advanced, cost-effective surveying equipment, cloud mapping software, and geospatial data mapping and analysis services in Indonesia, extend our warm regards. We provide high-precision measurement solutions tailored to infrastructure projects, topographic mapping, land surveys, and other geospatial needs.

We are proud to introduce one of our flagship products, the **TGS GNSS R Series**, a cutting-edge device designed to meet geospatial surveying requirements with unparalleled accuracy and operational efficiency.

The main features of the **TGS GNSS R Series** include:

- 1. **High Precision and Real-Time Speed**: Equipped with state-of-the-art technology to support geospatial data collection with sub-meter to centimeter-level accuracy, making it ideal for technical surveying needs.
- 2. **Flexible Connectivity**: Supports Bluetooth, Wi-Fi, and 4G connectivity for direct access to data in the field.
- 3. **Durable Design**: Built to withstand extreme field conditions, ensuring reliability across diverse environments.
- 4. **Ease of Use**: Features a user-friendly interface, enabling easy operation and data processing for users of all skill levels.

We firmly believe that the **TGS GNSS R Series** can provide tangible benefits to your organization by enhancing the quality and efficiency of your land surveying operations.
